Tunere

Legendarne tunere drevni su sustav za lov na tune koje danas golicaju maštu posjetiteljima i proiznecima koji pokušavaju dokuciti čemu služe ljestve koje se penju po zraku pod kutem od 45 stupnjeva te završavaju u prostoru iznad mora. Mnogi bi tunere slučajno interpretirali kao skakaonice, međutim - radi se o ipak mnogo složenijem aparatu. Naime, tunere su višestoljetni sistem koji omogućava lov na tune, a sastoji se od straže s koje se javlja gdje se tune kreću, mreža u koje se tune hvataju te portića. Danas su obnovljene najpoznatije bakačke tunere koje se mogu obići te pritom uživati u razmišljanju o prošlim vremenima. Zadnje su tune preko sustava tunera ulovljene 1977. godine.

Tunere

The legendary tuneras are tuna nets, an ancient system used for tuna fishing that captivates the imagination of visitors, as they try to comprehend the purpose of ladders suspended in the air at a 45-degree angle, leading to a space above the sea. Many may mistakenly interpret them as diving platforms, but they are actually part of a much more intricate apparatus. The tuna nets, known as tunere, are a centuries-old system designed for tuna fishing. They consist of lookout posts to spot the movement of tuna, nets to capture the fish and a platform. Today, the most renowned tuna nets in Bakar have been restored, allowing visitors to explore and reflect on bygone times. The last catch made using this old system occurred in 1977.

Danas je lokalitet Gradac skromno nalazište s interesantnim ruševinim ostacima građevina i sistema prastare utvrde, u brdu zaleda Kraljevice. Stari grad Zrinskih i Crkva Svetog Nikole

Prekrasna frankopanska utvrda, danas poznata pod nazivom Stari grad Zrinskih - nastaje u srednjem vijeku kraj kapele Sv. Nikole. Još od vremena Zrinskih i Frankopana ova velebna građevina oduševljava stanovnike i goste te je danas na popisu nacionalnih kulturnih dobara. Predvnu utvrdu s dva impozantna atrija i pročeljem okrenutim moru danas možete posjetiti tijekom raznih ljetnih, kulturnih i glazbenih događanja koja se održavaju unutar zidina ovog vrijednog povijesnog zdanja, povezujući vas i danas sa svojom starom baštinom. Sastavni dio kompleksa Staroga grada je i Crkva Sv. Nikole koja proširenjem postaje župna crkva. Znamenita je po oltarnoj slici Sv. Nikole, zaštitnika grada Kraljevice, koju je papa Pio VI. 1795. godine obdario posebnom povlasticom potpunog oprosta vremenitih kazni (grijeha) onome tko pohodi to svetište na blagdan Svetoga Nikole.

Old Town Zrinski and St Nicholas Church

The beautiful fortress, today known as Old Town Zrinski, was originally established during the Middle Ages near St Nicholas Chapel. This magnificent edifice since the times of Zrinski and Frankopans continues to charm both locals and tourists and it is recognized as a national cultural heritage site. You can visit this impressive fortress with its two spacious courtyards and a sea-facing façade during various summer cultural and music events taking place within its historic walls. An integral part of the Old Town complex is the Church of St Nicholas, which became a parish church after its expansion. It is famous for the altar painting of St Nicholas, the patron saint of the city of Kraljevica, which was commissioned by Pope Pius VI in 1795, who granted the special privilege of complete forgiveness of temporal punishments (sins) to those who visit that shrine on the feast of Saint Nicholas.

Dvorac Nova Kraljevica - Frankopan

Prekrasno zdanje dvorca izgrađeno je kao bogata rezidencijalna palača plemićkih obitelji Zrinski i Frankopan. Pravokutni tlocrt građevine dodatno je oplemenjen s četiri ugane kule, a cijela je građevina pozicionirana prema moru na samom početku Kraljevice kao budni čuvar. Nakon mnogih faza njegovog korištenja - od plemića, preko susovaca do ratnih funkcija - ovaj impozantan dvorac danas je kulturni centar i središte raznih događanja u Kraljevici. U dvorcu su se smjestili Posjetiteljski i Interpretacijski centar Kraljevica u sklopu projekta Kulturno-turistička ruta Putovima Frankopana te Mali muzej ribarstva i brodogradnje Kraljevica i galerija Ana Katarina. Ovaj obnovljeni kulturni spomenik, koji je po legendi mjesto kovanja poznate Urote zrinsko-frankopanske, danas je u svom punom sjaju te ponosno čeka na svoje posjetitelje.

Castle Nova Kraljevica - Frankopan

This beautiful castle was constructed as a grand residence for the noble families Zrinski and Frankopan. Its rectangular design is complemented by four corner towers, and it proudly overlooks the sea, serving as a vigilant guardian at the

entrance of Kraljevica. Having undergone various stages of use - from the nobility to the Jesuits and later military functions - this impressive castle now serves as a cultural centre and hosts various events. It is home to the Visitor and Interpretation Centre Kraljevica, as part of The Routes of the Frankopans project. A Small Museum of Fishing and Shipbuilding Kraljevica, and Ana Katarina gallery, are also located within the castle. This restored cultural monument which was, according to the legend, a site of the legendary Zrinski-Frankopan Conspiracy, today stands in all its glory, eagerly awaiting its visitors.

Brodogradilište i Luka Kraljevica

Vrijedno brodogradilište u Kraljevici prvo je brodogradilište izgrađeno na ovim područjima i to davne 1729. godine. Osnovano je ediktom austrijskog cara Karla VI., istovremeno kad i luka te od tada neprekinuto rade. U brodogradilištu "pioniru" osnovanom na ovim područjima najprije su se proizvodili vojni i trgovački jedrenjaci, a kasnije parobrodi. Svoj veliki procvat brodogradilište će doživjeti pod braćom Pritchard, britanskim brodograditeljima, koji počinju s izgradnjom ratnih parobroda u 19. stoljeću. Tijekom 1. Svjetskog rata u brodogradilištu se grade vojni brodovi za austrijsku ratnu mornaricu, a u nastavku 20. stoljeća razne vrste čeličnih brodova. Brodogradilište i Luka Kraljevica danas svjedoče o nevjerojatoj naprednosti i razvijenosti područja. Više detalja o povijesti tog perioda možete istražiti u Malom muzeju ribarstva i brodogradnje Kraljevica.

Shipyard and Port of Kraljevica

The valuable shipyard in Kraljevica is the first shipyard established in the area, dating back to the year 1729. It was founded by the edict of the Austrian Emperor Charles VI, along with the construction of the port, and has been in continuous operation ever since. In this pioneering shipyard, military and merchant sailing ships were initially built, later followed by steamships. The significant growth of the shipyard came under the guidance of the Pritchard brothers, British shipbuilders, who began constructing war steamships in the 19th century. During WW II, the shipyard produced military vessels for the Austro-Hungarian Navy, and throughout the 20th century, it expanded its production to various types of steel ships. Today, the shipyard and port of Kraljevica bear witness to incredible progress and development in the region. More details about this period's history can be explored at the Small Museum of Fishing and Shipbuilding Kraljevica.

Spomenik Sv. Nikole

Sveti Nikola voljeni je svetac ovih područja koji je najpoznatiji po svojoj ulozi zaštitnika djece i mornara te kao zaštitnik grada Kraljevice. S obzirom na činjenicu kako je područje Kraljevice oduvijek bilo poznato po pomorcima, 2008. godine akademski je slikar Josip Diminić izradio kip ovog značajnog svetca koji i danas podsjeća na značajne karakteristike Kraljevice i njenih stanovnika. Kip ima posebno mjesto u srcu lokalnog stanovništva, a posjetiteljima daje dašak mira i ljepote u prolazu.

Statue of St Nicholas

Saint Nicholas is a well-known and loved saint in these regions, most famous for his role as the protector of children and sailors as well as the protector of Kraljevica. Given the maritime heritage of Kraljevica, the statue of this significant saint was created in 2008 by the accomplished artist Josip Diminić. The statue serves as a reminder of the important characteristics of Kraljevica and holds a special place in the hearts of the local residents while offering visitors a glimpse of peace and beauty as they pass by.

Svetionik Rt Oštro - Lanterna

Poluotok Oštro, osim predivnih kupališta, borova i azurnog Jadranskog mora, nudi svojim posjetiteljima i skoro pa filmski prizor jedne od najljepših lanterni ovog područja. Naime, poluotok Oštro također je dom zanimljivom svjetioniku koji je jedan od najstarijih ikad izgrađenih od strane Austro-Ugarske na ovim područjima. Uništen 1872. godine uslijed sigurnosnih razloga Austro-Ugarske i sigurne plovidbe Jadranom, čekao je na neko bolje vrijeme. 2008. godine svjetionik je obnovljen te danas daje dašak posebnosti poluotoku Oštro, šarmirajući prolaznike s kopna i s mora svojim crveno-bijelim plaštem.

Cape Oštro Lighthouse - Lantern

In addition to stunning beaches, pine trees and the azure Adriatic sea, Cape Oštro offers its visitors another picturesque sight: one of the most beautiful lighthouses in the area. Indeed, Cape Oštro is also home to an intriguing lighthouse, one of the oldest ever constructed by the Austro-Hungarian Empire in this region. Destroyed in 1872 due to security reasons, it awaited better times. In 2008, the lighthouse was restored, adding a special touch of uniqueness to the Cape, captivating its visitors on land and sea with its red and white exterior.
